

S.TRA.TE.G.I.E. s.r.l.

Technology Transfer and Innovation Engineering Company
Spin-off of the Energy Department - Università Politecnica delle Marche

ACTIVITIES

*S.TRA.TE.G.I.E. SRL - the Università Politecnica delle Marche spin-off combines the **experience** of professors, the **determination** of young researchers the **creativity** and **enthusiasm** of young graduates, to develop **ideas** for the industrial sector*

MISSION

***transfer of technology and innovation engineering guide** for industrial and energy sector development*

HISTORY

S.TRA.TE.G.I.E. Srl was founded in 2005 by university professors and researchers in the Università Politecnica delle Marche Energy Department. In its start-up phase S.TRA.TE.G.I.E. Srl developed countless projects for the creation of cutting-edge energy systems and products.

Most of these projects were realized thanks to cooperation with partners already active in various production sectors. With many the partnership endured right through to product marketing or continued in the development of other types of innovative products.

ACTIVITIES

ENERGY AND CONVERSION SYSTEMS

Research and technology transfer in the energy conversion field, mainly for cooling plants and heat transfer in general.

THERMO-FLUID DYNAMICS

Development of software and operating procedures to evaluate fluid dynamics efficiency in heat transfer and energy conversion, to achieve plant optimization.

INNOVATION GUIDE

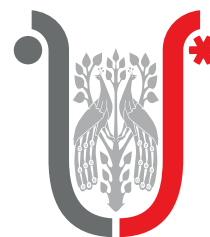

STRATEGIE's knowledge base and experience in the research field allow the company to guide businesses towards product innovation, with expertise ranging from feasibility studies to the experimental stage.

In particular, in the energy conversion sector this advisory capacity can extend to financial aspects and industrial manufacturing of the end product.

TECHNOLOGY TRANSFER

A team of young researchers reporting to senior colleagues, upgrading technical knowledge and industrial processes.

Technology transfer activities are always integrated with refresher courses for engineering staff.
